DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 1 recites a holder to which a storage medium can be attached, but does not recite the actual storage medium. Claims 4 and 5 however describe the size of the holder in terms of the medium. It is assumed for purposes of examination that the storage medium is part of the claimed invention. Correction of claim 1 to positively recite the medium is required.

4. Claim 1 describes the shape and size of the holder as similar to a "standard" credit card or business card. This is considered to be indefinite since "standard" does not adequately describe any particular size or shape. Also, business cards and credit cards are not all alike. It is not clear exactly what the size and shape of the holder are from this description.

5. The remaining claims are rejected as depending from a rejected base claim.

Information Disclosure Statement

6. The information disclosure statement filed 10 February 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all

other information or that portion which caused it to be listed. It has been placed in the application file, but the information for which a copy has not been filed has not been considered.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Perego, EP 1,083,563 A1 (Perego).

9. Perego discloses a holder for a computer readable storage medium, the holder having a planar shape and a size corresponding to a standard business card (as best as the instant claim can be understood).

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perego.

12. Perego teaches more than one medium attached to the card (column 1 lines 49-51).

Art Unit: 3611

13. Perego does not teach the specific dimensions of the holder, however the holder is larger than the planar area of the medium (Figure 4). Making the holder a specific percentage larger than the medium would have been obvious to a person having ordinary skill in the art, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

14. Perego also does not specify the thickness of the holder, however the holder is very thin. It would have been obvious to a person having ordinary skill in the art to make the holder less than 5mm so that it can be easily carried by the user.

Conclusion

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 5533614, 5769216, and publications 2005/0279658 and 2002/0154597 are cited as of interest.
